More about the PC125

This portable crimper is our flagship for the service industry. With solid construction and an ergonomic foot pedal, the PC125 easily adapts to your needs. It features an open design, removable pusher and easy-to-use rubber caged dies.

Crimper Capability – B2 (up to -20) and SG (up to -16 four wire)

See more info on our other crimpers

> [PC150](#) > [PC150HD](#) > [PC200i](#)

More about the PC150

Looking for more versatility out of your crimper? Our PC150 is a stationary crimper with more power to manufacture factory-quality hose assemblies quickly and easily. Its open design with removable pusher and “slide in” die configuration allows for good visibility and easy loading of die and hose assemblies. Crimp diameter is set and controlled with an easy-to-read metric micrometer. Designed to handle higher volumes in a shop environment.

Crimper Capability – B2 (up to -24) and SG (up to -16 four and six wire)

With double angle dies, the capability increases to the following:

- > SG (up to -24 four wire)
- > SG (up to -20 six wire)
- > S6 (-24 six wire)

More about the PC150HD

This hybrid machine is the best of both worlds. The PC150HD has a compact engineered design to handle higher volumes in a shop environment with the ease of a dial micrometer. Don't let the compact design fool you, its 240 tons of crimping force has the capability to crimp up to 2" industrial/braided hose and 1½" hydraulic!

Crimper Capability – B2 (up to -24) and SG (up to -20)

More about the PC200i

This cutting edge, cloud-based intelligent crimper is a high-volume, high-capacity stationary crimper utilizing microprocessor control for the fastest, most accurate crimping. Powered by CrimplIQ™ technology, this machine provides direct access to all crimping specifications and information. It supports a user-friendly interface to guide new and advanced users through the crimping process quickly and easily.

Crimper Capability – B2 (up to -32) and SG,S6 & SE (up to -32)
